VI: 09:00 - 16:00

VII: CLOSED

Coffee has about 1,200 chemical elements, but no one has yet counted how many new ideas, ingenious sentences or lyrics were born with a cup of coffee, how many charming sensations this drink gives away every day. Because some things are simply immeasurable. And that is why we love coffee the most. For a unique aroma and taste with a double bottom, which is so nice to experience - as if you learned an unexpected secret, for the

beauty of the ritual, suspended moments and inspiration.
