 kaunas@hello-park.lt

Hello Park is the world's largest multimedia park chain, with more than 30 parks around the world. Our main goal is to rethink entertainment and make it meaningful, immersive, and stimulating to kids' development. The park combines traditional children's games, colorful projections, and advanced technologies. It helps children learn new skills and develop their creativity in a playful, fun way. The multimedia format is new, makes it possible for quick changes to the park's content which creates the incentive for repeat visits and allows for many visitors at the

same time. All together this makes for a very attractive business opportunity.
