Balta Klinika is an accredited medical clinic that offers the highest quality health services including plastic and aesthetic surgery, general surgery, orthopaedics, orthopaedic traumatology, dermatology and physiotherapy, all performed by the leading specialists in the field.

Our experienced medical personnel consult and perform various plastic and aesthetic surgery procedures including the face, neck and eye lifting, otoplasty, breast implantation, augmentation and reduction as well as abdominoplasty and

liposuction, laser and surgical mole removals, treatments of tissue scarring, ulcers and burns. Our qualified medical doctors also perform skin rejuvenation procedures, botulinum toxin and hyaluronic acid injections as well as platelet-rich plasma (PRP) treatments.

We perform autologous adipose-derived stem cell treatments such as stromal vascular fraction procedures, which assist in skin rejuvenation as well as treatment of tissue scarring and wounds.

Our orthopaedic traumatologists consult on the treatment of various types of trauma, perform platelet-rich plasma injections for increasing regeneration of the affected tissues as well as offer tendon, bone tissue and artificial skin transplantation.

Balta Klinika offers physiotherapy procedures such as an evaluation and stimulation of psychomotor development in infants. Our qualified experts perform treatments suitable for adults that include increased muscle strength and the amplitude of joint movement, improving motor coordination and correcting the posture.

Our main working principles are quality, confidentiality and flexibility.
