

Wood based architecture

J. ŠILEIKA HOUSE

Žalioji g. 31, Kaunas

Since 1928 an oak (or so called owl) hill, has one storied wooden villa which belonged to the painter Jonas Šileika. It is featured with a pent balcony and a porch. The house was changing many times through years, but it is still possible to view general characteristics of the villa: wooden cladding, roof coating, preserved window expansion. A memorial plank with inscription: "From 1928-1960 a painter Jonas Šileika lived in this house" was fixed to the building earlier. Painter □□ friends and sculptor Juozas Zikaras, who lived in the neighborhood, visited that house.
