IV 11.00-19.00

VI, VII 10.00-17.00

It is the most unique and the only devils museum in the world. A famous Lithuanian painter, public figure and professor Antanas Žmuidzinavičius (1876-1966) started to assemble this collection which is widely known in the world now. The museum contains a collection of more than 3,000 devils: creations of fine and applied arts, souvenirs and masks not only from Lithuania but from around 70 countries. Every year thousands of guests who are interested in looking at this mythological creature visit the museum. You will find exhibits that correspond to your character features at The Devils ☐ Museum! There exists a great tradition: guests may present the museum with a devil.
